

The background of the slide is a dark teal color. In the center, there is a large, irregular, light yellow-green shape. This shape is surrounded by numerous concentric, rounded rectangular outlines in various shades of green, ranging from a bright lime green to a dark forest green. The outlines are slightly offset from each other, creating a layered, tunnel-like effect.

100 random blobs

July the 1st, 2016 — Vasilis van Gemert

Every day my webserver generates a new book, filled with blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
